

SOLVEO ENERGIES' Purchasing Policy

EXTERNAL POLICY

SOLVEO Energies, independent producer of green electricity, operator in green mobility and actor in the ecological transition, acts :

- In consultation with citizens, local authorities and companies,
- In respect of human activities and biodiversity,
- By contributing in local economic development.

SOLVEO Energies works alongside local authorities, businesses, farmers, associations, citizens and its employees are eager to offer solutions and participate in local life.

Our activities generate a need to purchase supplies, equipment and services.

In this context, we are committed to developing sustainable partnerships based on balanced and demanding relationships in terms of Quality, Safety and Environment. We wish to ensure the security of our supplies, the competitiveness of our costs and the sustainability of our solutions.

Our commitments

- A fair selection of our partners and suppliers, in compliance with ethical practices and based on objective criteria.
- Attention paid to the integration of societal and environmental responsibility concerns by conveying our values to our partners through the implementation of clear rules:
 - Consideration given to the safety and health of those working on our sites;
 - Respect and ensure the QSE rules are respected;
 - Protect the environment on our sites during construction and operation;
 - Measuring and reducing our carbon footprint.
- Support our partners in a joint approach to continuous improvement
- Seek out of court solutions to resolve conflicts

Our requirements

- Know and subscribe to our policy.
- Respect the rules laid down by SOLVEO ENERGIES in compliance with this policy:
 - To set up collective protections adapted to the provided services and to wear the suitable PPE;
 - Respect the prevention principles of the International Labour Organization ;
 - Identify the specific technical and environmental risks generated by each activities and take all steps to remedy them ;
 - Participate in the calculation of SOLVEO ENERGIES' Carbon Footprint.
- Provide quality products or services in compliance with the rules of art, our specifications and requirements.
- Propose to SOLVEO ENERGIES innovative solutions that will contribute to our projects' competitiveness and overall performance
- Transmit information, certifications or any requested documents in compliance with the legislation and the labor law
- Refrain from any form of fraud or counterfeiting , otherwise a penalty of prosecution and exclusion from the panel of suppliers of SOLVEO ENERGIES would apply.
- Prohibit any commercial practice that could be considered as corruption or that could cause a conflict of interest.
