

SOLVEO ENERGIES' Purchasing Policy

EXTERNAL POLICY

SOLVEO Energies, independent producer of renewable energy, operator in green mobility and stakeholder in energy transition, takes action:

- In consultation with citizens, territories and local communities,
- With respect for human activities and biodiversity,
- In a way that promotes the local economy and short supply chains.

Together with local authorities, companies, farmers, associations, citizens and its employees, SOLVEO Energies provides solutions and participates in local life.

Our business generates a need to purchase supplies, equipment and services.

In this context, we are committed to developing sustainable partnerships based on balanced and demanding relationships in terms of Quality, Safety and Environment. These ensure the security of our supplies, the competitiveness of our costs and the sustainability of our solutions.

Our commitments

- A fair selection of our partners and suppliers, in compliance with ethical practices and based on objective criteria.
- A focus on integrating societal and environmental responsibility issues by conveying our values to our partners through the implementation of clear rules:
 - Emphasis given to the health and safety of those working on our sites;
 - Respecting and ensuring QES rules are followed;
 - Protecting the environment on our sites;
 - Measuring and reducing our carbon footprint.
- Support our partners in a joint approach to continuous improvement
- Seek out-of-court solutions to resolve conflicts

Our Requirements

- Know and adhere to our policy.
- Respect the rules laid down by SOLVEO ENERGIES in compliance with this policy:

- Set up collective protective measures appropriate to the services carried out and wear suitable PPE;
 - Respect the prevention principles of the International Labour Organization;
 - Identify the technical and environmental risks specific to the activities of each person and take all steps to resolve them;
 - Participate in calculating SOLVEO ENERGIES' Carbon Footprint;
- Provide quality products or services that comply with standard practice, our specifications and requirements.
- Propose innovative solutions to SOLVEO ENERGIES that will contribute to our projects' competitiveness and overall performance
- Transmit information, certifications and/or any agreement requested by SOLVEO ENERGIES in compliance with the legislation and the French labour code
- Refrain from any form of fraud or counterfeiting, otherwise a penalty of prosecution and exclusion from the panel of suppliers of SOLVEO ENERGIES would apply.
- Prohibit any commercial practice that could be considered as corruption or that could cause a conflict of interest.
