SOLVEO ENERGIES - SUCCESSFUL BIDDER IN THE 2ND CFD AUCTION IN ROMANIA

Solveo International, a subsidiary of Solveo Energies, France, has through its SPV ACK SRL, been awarded a Contract for Difference (CfD) by the Romanian Ministry of Energy in the country's second CfD auction as announced on the 12th of August, 2025.

The contract is for a 15-year term and attributed to Solveo's Sticlaria project, a **38.4 MW wind farm** located in the Iași county in the northeast part of Romania. The project is expected to break ground in **Q2 2026**

Once operational, the wind farm with 6 wind turbines will generate around 105 GWh of clean electricity per year, equivalent to powering 58,000 Romanian households and avoiding ≈28,600 tons of CO₂ emissions annually.

Olga Constriciuc, Country Manager, Solveo Romania, said *"This remarkable achievement would not have been possible without the dedication, professionalism, and hard work of the Solveo team, as well as the invaluable contribution of our subcontractors and partners, who provided unconditional support throughout the entire process.*

We also extend our sincere appreciation to the Romanian Authorities for successfully organizing the second CfD auction and for establishing the robust legal and regulatory framework that enabled this landmark initiative.

The awarding of a Contract for Difference (CfD) to our project, CEE Sticlaria Wind Farm, represents not only a major milestone for Solveo in Romania, but also a significant step forward in supporting the country's clean energy transition.

Looking ahead, Solveo Romania remains committed to advancing a diversified portfolio of renewable energy projects, thereby contributing to strengthening Romania's energy security and shaping a brighter, greener future."

Frederik Nilsson, Managing Director, Solveo International, said *“This award is a major step forward for Solveo International to further strengthen the company’s development ambitions in Romania and structure Solveo Energies’ international expansion in the Southeast Europe region. This success is fully aligned with Solveo Energies’ long-term strategy to accelerate the deployment of renewable energy solutions across Europe, combining wind, solar, and innovative hybrid projects. We consider Romania as the driving country for renewable energy development in this part of Europe, and our Bucharest office is strategically located to ensure a successful expansion into the neighboring countries.”*

ABOUT SOLVEO ENERGIES

Solveo Energies, is an independent renewable energy producer focusing on development, financing, ownership, and operation of renewable solar and wind assets in France and Southeast Europe.

Solveo integrates all the business lines and expertise essential to successfully carry out projects using wind and photovoltaic technologies. Solveo works daily to satisfy its customers, improve its environmental performance and the technical excellence of its solutions. Solveo obtained certificates ISO 9001, ISO 14001 and ISO 45001, whereas in 2024, we were awarded ecoVadis' silver CSR label, confirming our commitment to sustainable development.

As of December 2024, our pipeline amounts to approximately 2,500 MW of wind and solar PV projects, with 97 MW of operational assets and 146 MW of projects under construction or in ready-to-build phase. Solveo Group had more than 310 employees with combined annual turnover of around 70m EUR (2024).

The development strategy of Solveo Energies is based on majority shareholding with long-term ownership interests throughout the Project's life cycle.
